VERIA 

Produkt specification - Veria Pipeheat

The heating cable is exclusively intended for frost protection of water pipes. Do not cover the heating cable with materials that cannot withstand +65°C.

Please note that Veria Pipeheat 10 must be supplied through a residual current device (RCD) having a rated residual operating current not exceeding 30 mA.

To be used for frost protection of temporary installations. Frost protection of permanent installations must be undertaken by a certified electrician in compliance with current high voltage regulations.

Do not replace the connecting cable. If the connecting cable is damaged, the entire heating cable must be discarded.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Operating power:	230 V~
Output:	10 W at 10° C
Min. bending radius:	35 mm
Max. ambient temperature:	65° C operating 85° C non-operating
Min. installation temperature:	-5° C
Insulation outer/core:	TPE/TPE
Connecting cable:	2 m

Installation guide

1. Tape the heating cable to the underside of the pipe with aluminium tape.
2. Insulate the pipe with at least 30 mm insulation or thicker if required.

The heating cable has the capacity to frost protect pipes up to 50 mm in diameter down to -25°C, provided it is insulated or buried according to these installation instructions.

Proof of Warranty

A 2 year warranty is hereby provided for:

Name:
