

Veria Control T45

Technical specifications:

● Dimension:	86mm x 86mm
● Veria Logic System (Sensor check):	Yes
● Density:	IP 30
● Accuracy:	±1° C
● Stand by consumption:	<2W
● Display:	LCD
● Operating voltage:	180-240V, 50Hz
● Max. load:	13A - 2990W at 230V
● Sensor type:	NTC
● Warranty:	2 years

Veria Control T45 is an advanced digital timer thermostat which allows you to control your floor heating system by either the floor temperature, the room temperature or combined.

The 5 + 2 days working mode allows you to programme your thermostat so that it follows your daily mode. Each day can be split into 4 individual time zones, which enables you to have exactly the temperature you want at any time of the day.

Using the timer programming functionality will save cost as the system is only working at the predetermined periods of the day.

Veria is a leading Danish manufacturer of electrical floor heating systems. It is our aim to enhance the quality of life by ensuring comfortably warm floors and thus improving the environment of family life.
